

# Stand Out and Scale Up with AI-powered vCISO Services

One powerful vCISO platform for MSPs, MSSPs, and cyber experts

**Offer new automated  
vCISO services**

**Scale and automate  
vCISO expertise**

# Scaling up excellence starts with automation

If you're a virtual CISO, a cybersecurity consultant, an MSP or an MSSP, your goal is to deliver maximum cybersecurity excellence at scale. That means gaining total visibility into cyber risk, developing an effective cybersecurity strategy and accelerating compliance processes while providing maximum protection.

Cynomi empowers cybersecurity professionals to effectively manage cyber risk, compliance, and operations with automated enterprise-grade cybersecurity capabilities at unparalleled scale. The company's AI-powered vCISO platform helps quickly build and execute an effective tailor-made cybersecurity strategy. With Cynomi, MSSPs, vCISOs, and cyber consultancies can easily scale up services while reducing operational costs, professional knowledge gaps, and churn. MSPs can build new services to rapidly grow the sales pipeline, accelerate deals, increase upsells and drive revenue. Clients across all major industries rely on Cynomi to optimize their cyber posture, expand their offering, maximize return on security investment and drive growth.

## Powerful personalization

### Tailor-made cybersecurity policies

Generate cybersecurity policies on the fly. Automatically generated, NIST based action plans tailored to each and every client.

### Know the score

Understand how your client posture ranks, benchmarked against their sector, its regulations, and compliance. Show them how they stack up among their respective industries.

## Visibility

### Total visibility into clients' risk exposure

See the vulnerabilities your client is exposed to, and, since it's prioritized, it's very clear to know what to do next.

### Know what's next

Cynomi reflects your client's current cyber risk landscape so you and your client are always in the know.

## Compliance

### Easily create a structured plan for compliance

Policies can be mapped to every framework, so you can get a prioritized task list to achieve compliance.

### Balance cybersecurity and compliance

Smart prioritization based on each client's needs.

I totally see more and more use for this. This is a slam dunk. The output you get is out there. Very easy to use"

Derek Moris,  
Principal, Wolf & Company P.C.
